Surely everybody knows the chips – «**GOLDEN**» thins – since their childhood! They are made from natural mashed potatoes and fried in pure sunflower oil to a crispy **GOLDEN** crust.

Due to the high requirements for raw materials, a large number of potatoes in the composition and a unique way of frying (they are immersed in oil for only 9 seconds, unlike any ordinary sliced potato chips), «**GOLDEN**» chips are an exceptional product for our market. Carefully selected flavor line of chips meets consumer demands and is periodically updated, and currently, there are 8 different flavors on the market available.
