---------------------	-----------------------------	---

Our youngest brand, under which we produce the crunchiest figured snacks in Ukraine – **Hrustata Potata!**

The secret of Hrustata Potata snacks is that the pure sunflower oil is used for their preparation, in which they are fried for only 9 seconds! This is why they are so incredibly puffed and crunchy.

Hrustata Potata is bright not only on the outside – inside each pack with individual taste – the snacks are different in shape, they match the taste!
